

‘Colorado State of Mind’ Examines Our Energy Industry

Denver—(December 17, 2008)—This week’s edition of “Colorado State of Mind,” the Emmy-winning program on Rocky Mountain PBS, will look at Colorado’s energy industry as it adapts to new state regulations and to new circumstances in the economy of the state, the nation and the world.

Will the extraction and development of oil and gas continue to be the engine it has been? Also, will the emphasis on renewable energy sources change the face of the industry in Colorado?

Cynthia Hessin will host this week’s program. Joining her are:

- Peter Dea, geologist and founder of Cirque Resources
- Mike Beatty, energy industry attorney
- Randy Udall, independent energy analyst
- Cathy Proctor, energy reporter for the *Denver Business Journal*

The discussion happens on “Colorado State of Mind,” Friday night at 7:30 on Rocky Mountain PBS.

“Colorado State of Mind”

Each week on “Colorado State of Mind,” Rocky Mountain PBS brings together media members and policy makers of all points of view to discuss issues that affect Coloradans. The program is part of the network’s Friday night public affairs lineup, which includes “Washington Week,” “The McLaughlin Group,” “Now on PBS,” and “Bill Moyers Journal.” Join the discussion every Friday night at 7:30 or anytime online at rmpbs.org/stateofmind.

Rocky Mountain PBS

Each week, Rocky Mountain PBS invites the 1.6 million people we reach throughout Colorado to experience the world of award-winning local, national and international programming; hear diverse viewpoints; take front row center seats to world-class drama and performances; and enjoy lifelong learning services for children and adults.

Rocky Mountain PBS will celebrate its 53rd anniversary on the air in January 2009. The network began in Denver in 1956 as Colorado’s first public television station. It is now Colorado’s only statewide television network, with stations in Denver (KRMA-TV/DT), Pueblo/Colorado Springs (KTSC-TV/DT), Steamboat Springs (KRMZ-TV/DT), Grand Junction (KRMJ-TV/DT) and Durango (KRMU-DT).
